MENTIS COMPETENCY **CONTINUUM**

MENTIS

Mentis Health Solutions' Competency Continuum (MCC) program provides comprehensive care, education, and support to individuals in jails and communities who need timely and effective treatment to participate in their own legal process.

WHEN EVERY DAY COUNTS

The clock starts ticking as soon as an individual is deemed in need of competency restoration. MCC delivers the elevated responsiveness and multi-disciplinary forensic services needed to make every day count to alleviate the persistent problems of backlogs and delays, including:

- Delays that extend incarceration, stall treatment, and limit an individual's ability to participate in their legal process
- Prolonged jail stays that increase overcrowding and strain already limited staff and resources
- Restricted state hospital capacity that delays access for individuals with higher-acuity inpatient needs
- Heightened legal, compliance, and financial risk driven by prolonged system delays

REAL-WORLD RESULTS. MEASURABLE IMPACT.[1]

- **Demonstrated ROI -** Generated more than 3.5x the program cost in diversion-related savings *in Year One*
- **Clinically Effective -** Over 90% success rate in competency restoration treatment
- **Accelerated Treatment -** Over 50% reduction in wait time from jail to state hospital admission
- **Reduced Capacity Strain -** Nearly 15% of active commitments to state hospital rescinded
- **Community-Based Care -** Nearly 20% of individuals served in the community setting

FLEXIBLE SOLUTIONS FOR TODAY AND TOMORROW

The Mentis Competency Continuum provides flexible solutions that meet communities where their needs are today and adapt as those needs evolve. From mobile response to services delivered in existing facilities and purpose-built treatment residences, Mentis creates an integrated path to expand access and capacity, reduce pressure on jails and state hospitals, and support more timely, effective, and dignified care.

MOBILE SERVICES

Rapid response teams deliver treatment where it is needed most, in communities and jails

EXISTING FACILITIES

Multi-disciplinary teams, programming, and forensic services in available facilities

NEW TREATMENT RESIDENCES

Purpose-built, normative housing designed by clinicians and ready in months, not years

[1]Centurion Health program data from Allegheny County Mobile Competency Restoration and Support Team (MCRST), 2025–2026. Results reflect outcomes from a comparable competency restoration model.

HOW WE HELP

Faster Access to Care

- Rapid response and early engagement
- Reduced wait times for competency restoration

Coordinated, Whole-Person Support

- Clinical care + case management + legal education
- Continuity from referral through case resolution

Care Delivered Anywhere

- Flexible continuum of care across jails, communities, and treatment settings - ours or yours

System-Level Impact

- Reduced capacity strain on jails and hospitals
- Improved outcomes and long-term stability

WHO WE SERVE

Individuals deemed Incompetent to Stand Trial (IST) and likely to be restored	Justice-involved individuals awaiting competency restoration services in jail	Individuals awaiting placement or transfer to state hospital for restoration	Individuals eligible for community-based restoration and diversion pathways

THE MCC ADVANTAGE

- Rapid response and early engagement to reduce delays and stabilize individuals sooner
- Care delivered where individuals are including jail, treatment settings, and community
- Multidisciplinary team model integrating clinical care, case management, and legal education
- Continuous support across the full legal process, from referral through resolution
- Assertive outreach approach that builds trust and drives sustained engagement
- Designed to reduce pressure on jails and state hospitals while improving outcomes

HOW MCC WORKS

1. Court-ordered referral following competency evaluation
2. Rapid intake and assessment with initial engagement within days
3. Individualized treatment planning using a multidisciplinary team
4. Delivery of clinical care, competency education, and case coordination
5. Weekly or more frequent engagement based on level of need
6. Ongoing support across settings including jail and community
7. Discharge planning and transition support through case resolution and community connection
